Please support this bill. City jobs are great and outsourcing is bad for everyone. With Contractors it is 1) hard to maintain quality 2) someone on staff has to make sure the work is being done 3) contractors still have labor costs 4) your contractor doesn't care about the end user as much as you do, too many degrees of separation 5) it creates a monopoly on City facilities, pool, tennis courts, gym and makes the services very expensive to the end user.
